# Our Company

Our company has been operating on an international level since its founding. More countries are recognizing crypto currencies every day, and blockchain technology is supported at various levels of the financial sector.

Bitcoin is open-source; its design is public, nobody owns or controls Bitcoin and everyone can take part. Through many of its unique properties, Bitcoin allows exciting uses that could not be covered by any previous payment system.

# Coin Trading

**The Foreign Exchange C o i n market (Forex) is truly the largest exchange in the world. The amount of dollars traded on the Forex market on a daily basis is in the trillions. Most of this currency trading takes place between between large banks, central banks, currency speculators, multinational corporations, governments and other financial markets and institutions. However, individual traders are starting to get in the mix, using internet discount brokers such as trade to participate in the currency exchangemarket.**

# CMD MESSAGE

Dear Valuable Customers,

On behalf of realtrade plus family, allow me to welcome you to our website. It is my pleasure to welcome you to one of the leading company of the india. I am delighted to have you on board as company Group continues to establish itself as the leading provider of the real coin trading and learning services. We strongly believe that both, the current market turbulence and the inflationary environment provide a good momentum to invest in real trading companies and are enthusiastic about the opportunities that lie ahead for our clients.

**Jagdish Reddy - CMD (REAL TRADE PLUS)**

## Crypto Trading

Crypto trading, or cryptocurrency trading, is simply the exchange of cryptocurrencies. Like in Forex, you can also buy and sell a cryptocurrency for another, like Bitcoin or altcoin for USD and Euro. This is one way of getting involved in the world of cryptocurrencies without having to mine it.

Transactions are sent between peers using software called “**cryptocurrency** wallets.” The person creating the transaction uses the wallet software to transfer balances from one account (AKA a public address) to another.

# Benefits of Arbitrage

01

## No Involvement of Any Third Party

There's no involvement of a third party. No one can freeze, tax, or claim your coins. They cannot be stolen and cannot be seized by the government in no possible circumstances.

02

## Quick Payments

Credit card funds can be locked up for as long as a week (or even more) in case a customer asks for a chargeback. Thus, payment delays occur for apparently no reason whatsoever.

03

## A Safer Ecosystem

Each bitcoin wallet transaction is signed by an authentic digital signature before it is sent to a blockchain.

04

## International Payments Made Easy for Small Business Ventures

Small online sellers and retailers don't often sell their services or products internationally because of the high cross-border transaction fees.
